| HIV Cases by Age at time of Diagnosis         |      |                                 |
|   | #    | %                               |
| <13   | 12   | <1                              |
| 13 - 19                                       | 49   | 3                               |
| 20 - 29                                       | 497  | 31                              |
| 30 - 39                                       | 532  | 33                              |
| 40 - 49                                       | 350  | 22                              |
| 50+   | 153  | 10                              |

\*As of April 2006, cases of HIV infection became reportable by name. In order to most completely and accurately characterize the HIV epidemic in Long Beach, the City of Long Beach Department of Health and Human Services is now reporting all known HIV cases to the State Office of AIDS, including both newly identified infections, as well as, those cases previously reported by a non-name code prior to April 17, 2006 for which a name can be ascertained.

For more information please visit the Health Department's website at [www.longbeach.gov/health](http://www.longbeach.gov/health).  
For specific data requests or to report an HIV/AIDS case, phone (562) 570-4213.

\*Data are provisional due to reporting delay
